

SAP S/4HANA Migration

ABOUT SOLUTION

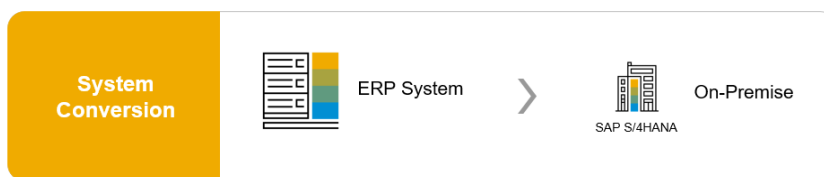

SAP S/4HANA is proving to be SAP's most successful ERP system. SAP's involvement with ERP solutions dates back to 1979 when SAP R/2 was launched. In 1992, SAP R/3 was introduced and we have continued to see improvements as the product has evolved from SAP ERP in 2004 to SAP S/4HANA in 2015. The launch of this 4th generation SAP ERP solution is timely, as it has coincided with new technologies and concepts that are driving global business operations, such as cloud services and mobile computing.

With NEXtier S/4HANA Migration Solution, you will be able to leverage on the new technology of S/4HANA and reap the business benefits of this new technology

PACKAGE BUSINESS PROCESSES SUPPORTED

System Conversion

The complete conversion of an existing SAP Business Suite system to SAP S/4HANA (lift & shift): customers who want to change their current SAP ERP system to SAP S/4HANA. This scenario is technically based on Software Update Manager (SUM) with Database Migration Option (DMO) in case the customer is not yet on SAP HANA as the underlying database.
